

SKILLS

- Java, Spring Boot, Microservices, REST API, SQL, Git, Azure, Docker, Elastic Search, SonarQube

EXPERIENCE

Software Engineer

Feb 2022 - Sep 2024

DXC Technology

- Developed a scalable backend applications using Java, Spring Boot, Hibernate, REST APIs, SQL, JWT Authentication, and Redis by implementing new features, optimizing REST APIs and SQL queries, and improving application performance and scalability.
- Collaborated with cross-functional teams in an Agile environment to develop, test, and deploy software using Git, Jenkins, SonarQube, and CI/CD pipelines.
- Debugged and optimized backend applications for performance, reliability, and maintainability.
- Provided L3 production support by performing root cause analysis, resolving critical production incidents, and monitoring applications using the ELK Stack.

Software Trainee

Oct 2020 - Jan 2021

Quotus Software Solutions Pvt. Ltd.

- Completed hands-on training in Java, SQL, JDBC, and Object-Oriented Programming.
- Assisted in developing and testing Java-based applications under the guidance of senior developers.
- Gained practical exposure to the Software Development Life Cycle (SDLC) and teamwork.

PROJECTS

E-commerce backend system

<https://github.com/sudhir-tech/ecommerce-backend-springboot>

- Developed a scalable e-commerce backend application using Java, Spring Boot, MySQL, JPA/Hibernate, Redis and REST APIs with a layered architecture.
- Implemented JWT authentication and role-based authorization using Spring Security to secure user access and APIs.
- Designed and developed RESTful APIs for user, product, cart, and order management with efficient database persistence using JPA/Hibernate.
- Optimized application performance through pagination, filtering, caching, and SQL query optimization.

Library Management System-Spring Boot

<https://github.com/sudhir-tech/Library-management-system>

- Designed and developed a library management system for librarians and students.
- Built REST APIs for book inventory, issue, return, and purchase workflows.
- Implemented authentication and authorization using Spring Security.
- Ensured application quality using JUnit testing, SonarQube analysis, and Log4j logging.

Production Incident Management

Provided L3 production support, root cause analysis, production debugging, incident resolution, and ELK Stack monitoring for enterprise applications.

ACHIEVEMENTS

- Solved 500+ Data Structures and Algorithms problems across LeetCode and Scaler.
- Advanced Data Structures and Algorithms Certification – Scaler Academy.
- SQL Certification – Scaler Academy.
- Generative AI Certification.

EDUCATION

Scaler X Woolf University

2027

MS

Master's in Computer Science. (2025-2027)

Jspider Training & Development

2022

Other

Java Full Stack Training. (2021-2022)

C.V. Raman Global University

2020

BE/B.Tech/Bs

Bachelor's in Electronics and Telecommunication. (2016-2020)
